

# THE COMPLETE HOME JOURNAL

## SYSTEM REQUIREMENTS

<b>Hardware:</b>	PC or Mac (Mac must have Windows installed)
<b>Operating System:</b>	Windows 7 or Higher Recommended (will run on Windows XP)
<b>Free Disc Space:</b>	100MB

## INSTALLATION INSTRUCTIONS

- Insert The Complete Home Journal CD-ROM into the CD-ROM Drive of your computer.

**Note:** If your computer does not have a CD-ROM Drive you may copy the entire contents of The Complete Home Journal CD to a USB memory stick.

- If the Installation start-up screen appears, follow the on screen instructions
- If the Installation start-up screen does not appear automatically, choose RUN from the Start menu, then type D:\SETUP (or replace "D" with the letter that represents your CD-ROM drive) and click OK. When the start-up screen appears, follow the on-screen instructions.

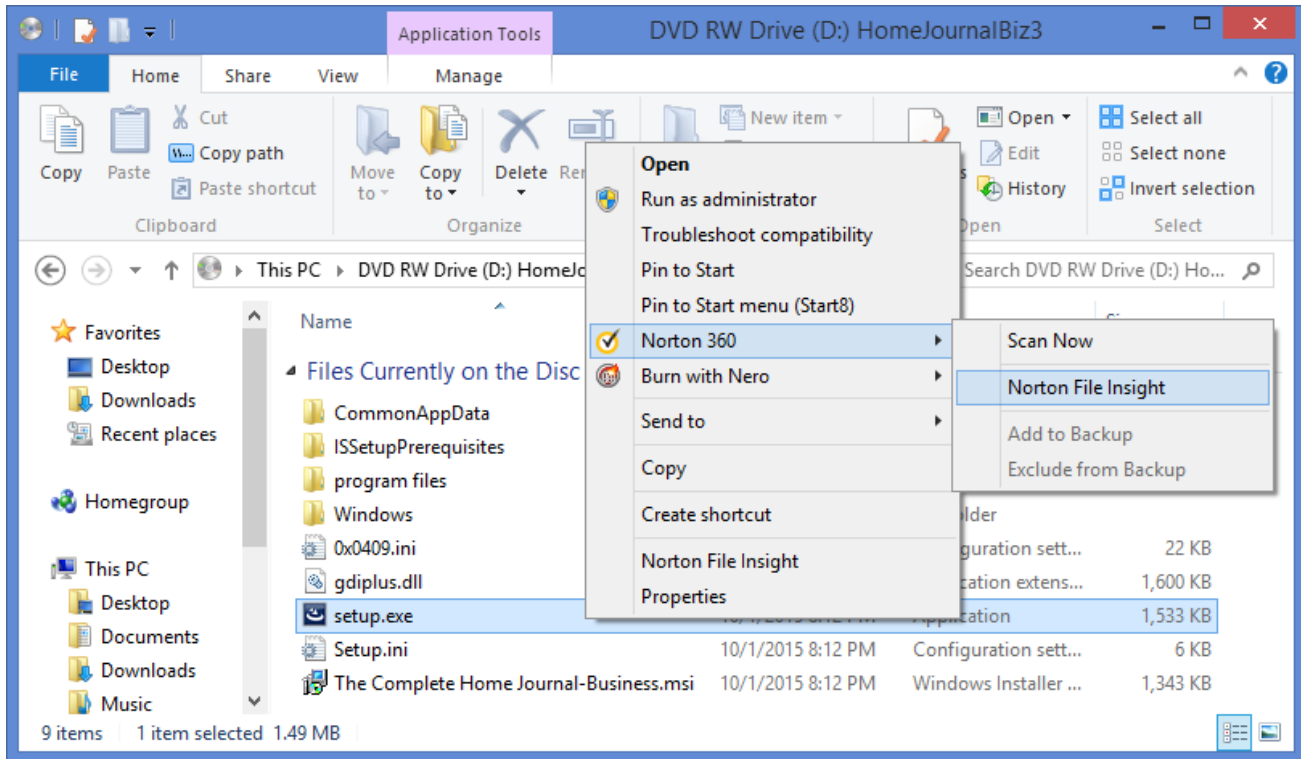

## TROUBLESHOOTING

### Virus Protection Software:

Your virus protection software may be preventing you from running the 'setup.exe' file on the Home Journal installatin CD. If you try to run the 'setup.exe' file from the CD and the installation startup screen does not appear, try to select the 'setup.exe' file, click your right mouse button and look for an option to choose your virus software and flag our 'setup.exe' file as safe.

For example, if you have the popular Norton software you may simply select the 'setup.exe' file, right mouse click, select 'Norton File Insight' then choose the 'Trust Now' option as shown on the images below.

Click to select the 'setup.exe' file on the installation CD then click the right mouse button. Select 'Norton 360' or the virus software program running on your computer.

Once the File Insight popup window appears, choose the option to TRUST the file. Note, other virus protection products may have similar options to flag a file as safe or trusted.
